According to the business location registration certificate No. 00001 issued by the Hanoi Department of Planning and Investment for the first time on September 5, 2024, the Company registered its business location at the Service Area, 6th floor, Golden Palm Building, 21 Le Van Luong, Nhan Chinh Ward, Thanh Xuan District, Hanoi City, Vietnam.

### II. BASIS FOR PREPARING FINANCIAL STATEMENTS FOR THE 3rd QUARTER OF 2025 AND THE ACCOUNTING PERIOD

### Basis for preparing Financial Statements for the 3rd Quarter of 2025

The accompanying Financial Statements for the 3rd Quarter of 2025, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, Accounting regime for enterprises and legal regulations relating to financial reporting.

The accompanying Financial Statements for the 3rd Quarter of 2025 are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

### III. ACCOUNTING STANDARDS AND APPLIED ACCOUNTING REGIME

General Director and the Board of General Directors of the Company ensure that they have complied with the requirements of Vietnamese Accounting Standards, Vietnamese Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC ("Circular 200") dated December 22, 2014 of the Ministry of Finance, Circular No. 53/2016/TT-BTC dated March 21, 2016 of the Ministry of Finance on amending and supplementing a number of articles of Circular No. 200/2014/TT-BTC as well as Circulars guiding the implementation of accounting standards of the Ministry of Finance in preparing and presenting Financial Statements for the 3rd Quarter of 2025.

### IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following are the main accounting policies applied by the Company in preparing the Financial Statements for the 3rd Quarter of 2025:

### **Accounting estimates**

The preparation of Financial Statements for the 3rd Quarter of 2025 in compliance with Vietnamese accounting standards, accounting regimes for enterprises and legal regulations related to the preparation and presentation of Financial Statements for the 3rd Quarter of 2025 requires the Board of Directors to make estimates and assumptions that affect the reported figures on liabilities, assets and the presentation of contingent liabilities and assets at the date of the Financial Statements for the 3rd Quarter of 2025 as well as the reported figures on revenues and expenses during the fiscal year. Although the accounting estimates are made with all the knowledge of the Board of Directors, the actual amounts incurred may differ from the estimates and assumptions made.

### Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, which are highly liquid, demand deposits and short-term investments with original maturities of no more than three months, readily convertible to cash and subject to an insignificant risk of changes in value.

FORM NO. B 09 - DN

Service Area 2, 6th floor, 21 Le Van Luong Street, Thanh Xuan Ward, Hanoi City

Issued with Circular No. 200/2014/TT-BTC Dated December 22, 2014 of the Ministry of Finance

NOTES TO THE COMBINED FINANCIAL STATEMENTS (CONTINUED)

These Notes are an integral part of and should be read in conjunction with the accompanying combined financial statements

### IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### Financial investments

### Trading securities

Trading securities are securities held by the Company for trading purposes. Trading securities are recorded from the date the Company acquires ownership and are initially valued at the fair value of the payments at the time the transaction occurs plus costs related to the purchase of trading securities.

In subsequent accounting periods, securities investments are determined at original cost less impairment on trading securities.

The time of recording trading securities is the time the Company has ownership right, specifically as follows:

- For listed securities: recorded at the time of order matching (T+0).
- For unlisted securities: recorded at the time of official ownership according to the provisions of law.

Interest, dividends and profits of periods before the trading securities are purchased are accounted for as a reduction in the value of such trading securities. Interest, dividends and profits of periods after the purchase of trading securities are recorded as revenue. Dividends received in shares are only tracked by the number of shares increased, not the value of the shares received.

A provision for the devaluation of trading securities is established for each type of security traded on the market when its market price is lower than its original cost. The fair value of listed trading securities on the stock exchange or traded on the UPCOM market is determined based on the closing price on the financial year-end date. In case the stock exchange or the UPCOM market is not trading on the financial year-end date, the fair value of securities is determined based on the closing price of the most recent trading session before the financial year-end date.

Increases or decreases in the amount of provisions for devaluation of trading securities that need to be made at the end of the fiscal year are recorded in financial expenses.

### Held to maturity investments

Held-to-maturity investments include investments that the Company has the intention and ability to hold until maturity. The Company's held-to-maturity investments include: term deposits held by the Company to maturity for the purpose of earning periodic interest.

Held-to-maturity investments are recorded from the date of acquisition and initially measured at the purchase price and expenses related to the purchase of the investments. Interest income from investments held to maturity after the acquisition date is recognized in the Income Statement on an accrual basis. Interest earned before the Company holds is deducted from the cost at the date of acquisition.

### Loans

Loans are determined at original cost less provision for doubtful debts. The provision for doubtful debts on the Company's loans is made in accordance with current accounting regulations.

### Investment in associates

An associate is an entity in which the Company has significant influence but which is neither a subsidiary nor a joint venture of the Company. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

FORM NO. B 09 - DN

Service Area 2, 6th floor, 21 Le Van Luong Street, Thanh Xuan Ward, Hanoi City Issued with Circular No. 200/2014/TT-BTC Dated December 22, 2014 of the Ministry of Finance

NOTES TO THE COMBINED FINANCIAL STATEMENTS (CONTINUED)

These Notes are an integral part of and should be read in conjunction with the accompanying combined financial statements

### IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The Company initially recognises its investment in an associate at cost. The Company recognises in the income statement the portion of the accumulated net profits of the investee arising subsequent to the date of acquisition. Any other amount received by the Company other than the profit distributed is considered a recovery of the investment and is recorded as a reduction in the cost of the investment. Dividends received in shares are only recorded as an increase in the number of shares, not the value of the shares received.

Provision for losses on investments in associates is set aside when the associate suffers a loss, with the provision equal to the difference between the actual capital contributions of the parties in the associate and the actual equity multiplied by the Company's capital contribution ratio compared to the total actual capital contributions of the parties in the associate. If the associate is the subject of the Financial Statements for the 3rd Quarter of 2025, the basis for determining the provision for losses is the Financial Statements for the 3rd Quarter of 2025.

Increases and decreases in the provision for losses on investments in associates that must be set aside at the end of the fiscal year are recorded in financial expenses.

### Investment in equity instruments of other entities

Investments in equity instruments of other entities represent investments in equity instruments but the Company does not have control, joint control or significant influence over the investee.

Investments in equity instruments of other entities are carried at cost less provisions for impairment in investment value.

FORM NO. B 09 - DN

Service Area 2, 6<sup>th</sup> floor, 21 Le Van Luong Street, Thanh Xuan Ward, Hanoi City Issued with Circular No. 200/2014/TT-BTC Dated December 22, 2014 of the Ministry of Finance

NOTES TO THE COMBINED FINANCIAL STATEMENTS (CONTINUED)

These Notes are an integral part of and should be read in conjunction with the accompanying combined financial statements

### IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### Receivables

Receivables reflect the amounts which shall be receivable from customers and others, which are presented at book value less by provision for doubtful debts.

Provisions for doubtful debts of receivables represent the portion of receivables that the Company estimates to be uncollectible as of the end of the accounting period. Increase or decrease of the provisions is recognized as administration expenses in the income statement.

### Inventories

Inventories are measured at the lower of cost and net realizable value. Cost includes direct materials, direct labour and overheads, if any that have been incurred in bringing the inventories to their present location and condition. Cost is determined using the first-in, first-out method. Net realizable value is determined as the estimated selling price less the estimated costs of completion and costs to be incurred in marketing, selling and distribution.

The Company's provision for inventory impairment is made in accordance with current accounting regulations. Accordingly, the Company is permitted to make provision for obsolete, damaged or substandard inventories and in cases where the cost of inventories is higher than the net realizable value at the end of the financial year.

### Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The cost of tangible fixed assets comprises the purchase price and any other costs directly attributable to bringing the asset to working condition for its intended use.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

	<u>Years</u>
Buildings & structures	38 - 40
Means of transport & transmission	08 - 10
Management equipment and tools	03 - 10

The depreciation period of the Company's buildings and structures (office area at 21 Le Van Luong, Nhan Chinh Ward, Thanh Xuan District, Hanoi City) is 460 months, starting from the time the Company uses the office (November 4, 2024) to February 28, 2063 (the term on the corresponding land use right certificate).

### Investment properties

Investment properties include land use rights and factories, buildings held by the Company for the purpose of earning rental income or for capital appreciation. Investment properties held for lease are stated at cost less accumulated depreciation. Investment properties held for capital appreciation are stated at cost less impairment. The cost of purchased investment properties comprises the purchase price and directly attributable costs such as legal consultancy fees, property transfer tax and other related transaction costs.

For investment properties held for capital appreciation, the Company does not depreciate. In cases where there is clear evidence that the investment properties held for capital appreciation have decreased in value compared to market value and the decrease can be determined reliably, the investment properties held for capital appreciation are recorded as a decrease in cost and the loss is recorded in cost of goods sold.

FORM NO. B 09 - DN

Issued with Circular No. 200/2014/TT-BTC

Thanh Xuan Ward, Hanoi City

Dated December 22, 2014 of the Ministry of Finance

### NOTES TO THE COMBINED FINANCIAL STATEMENTS (CONTINUED)

These Notes are an integral part of and should be read in conjunction with the accompanying combined financial statements

### IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### Investment properties (Continued)

The transfer from owner-occupied property to investment property or from investment property to owner-occupied property or inventory occurs only when there is a change in use. Owner-occupied property is transferred to investment property when the owner ceases to use the property and when another party enters an operating lease. Investment property is transferred to owner-occupied property when the owner begins to use the property. Investment property is transferred to inventory when the owner begins to develop the property for sale. Inventory is transferred to investment property when the owner begins to lease it to another party. Construction property is transferred to investment property when the construction phase is completed and the property is put into investment.

A change of use between investment property and owner-occupied property or inventory does not change the carrying amount of the asset transferred and does not change the cost of the property for valuation purposes or for financial reporting purposes.

### Prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to the results of production and business activities of many accounting periods. The Company's prepaid expenses include tools, supplies issued for use, office repair costs and other prepaid expenses that are considered to provide future economic benefits to the Company. These costs are capitalized as prepayments and allocated to the Income Statement using the straight-line method in accordance with current accounting regulations.

### Accured expenses

The provision of advance costs to provisionally calculate the cost price of projects complies with the principle: The Company only provides advance costs to provisionally calculate the cost price for projects and items that have been completed and determined to be sold during the year. The provisional costs included in the cost price are the costs that are included in the investment and construction estimates but do not have enough records and documents to accept the volume. The provisional provisional cost amount must correspond to the cost price norm calculated according to the total estimated cost of the project or item determined to be sold. The provisional provisional cost for production and business costs during the period must be calculated strictly and must have reasonable and reliable evidence of the costs that must be provisionally provided during the period, to ensure that the amount of costs payable recorded in this account is consistent with the actual costs incurred.

### Revenue recognition

### Revenue from operating property rental

Revenue from operating assets is recognized on a straight-line basis over the lease term. Rental income received in advance for multiple periods is allocated to revenue in accordance with the rental term.

### Interests

Interests shall be recorded on accrual basis, which are determined based on balance of the principal and actual interest rate of each term. Interest income from investments is recognized when the Company is entitled to receive the interest.

FORM NO. B 09 - DN

Issued with Circular No. 200/2014/TT-BTC Dated December 22, 2014 of the Ministry of Finance

NOTES TO THE COMBINED FINANCIAL STATEMENTS (CONTINUED)

These Notes are an integral part of and should be read in conjunction with the accompanying combined financial statements

### IV. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

### **Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the Financial Statements for the 3rd Quarter of 2025 and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the prevailing tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

### Earnings per share

Basic earnings per share is calculated by dividing the profit or loss after tax distributed to shareholders owning ordinary shares of the Company (after adjusting for the appropriation of bonus and welfare funds) by weighted average number of common shares outstanding during the year.

Diluted earnings per share is calculated by dividing the after-tax profit (or loss) to holders of the Company's common shares (after adjusting for dividends on convertible preferred shares) for the weighted average number of ordinary shares outstanding for the year and the weighted average number of ordinary shares to be issued in the event that all potential shares of common stock have a dilutive are converted into common shares.

### Related parties

Regarded as related parties are businesses - including parent companies, subsidiaries, affiliates - individuals who, directly or indirectly through one or more intermediaries, have control over the Company or are under the control of the Company, or under common control with the Company. Associates, individuals who directly or indirectly hold the voting power of the Company and have significant influence over the Company, key management positions such as directors, officers of the Company, Close members of the family of these individuals or affiliated parties or companies associated with these individuals are also considered related parties.

In considering each related party relationship, attention is paid to the nature of the relationship, not the legal form.
